Information Technology Insitute (ITI)

University Experience

Social Networking Website
- Designed and created a social networking website, where you can add friends and access their interests and images
- Also you have a newsfeed page where you can check all your friends' updates.
- HTML, CSS, PHP and using phpMyAdmin as a database source were involved in this project.

MS Pac-Man Game
- The well known Ms Pac-Man game was created with multiple levels installed. Design Patterns such as Singleton were used proactively while developing the game using Java Slick2D Library

Paint Application
- A desktop application that allows the user to draw or paint bitmapped images on a computer using interactive GUI, which is coded using Java

Implemented SIC/SICXE Assembler
- This project was implemented using Java with a smooth UI to the eyes and Oriented coding

Extracurricular Activities

CLIMA IOS-APP
- Designed and created an application that provides the live weather for the user's location once they grant access to their locations. Also it provides the live weather for any city the user requests, using OpenWeather API. The app were created using the MVC and the delegate Design Pattern

DESTINI IOS APP
- An App that is a "choose your own adventure" game similar to the App Store hit "Life Line" app. The app tells a story depending on what the user chooses and can be fleshed out and modified to provide an engaging story-telling experience. This app was created using the MVC Design Pattern

Interpersonal Skills

Highly Motivated
Leadership Skills
Team Worker
Excellent Presentation skills
Problem Solving Skills
